Parker Hannifin

The global leader in motion and control technologies

A world class player on a local stage

Global Product Design

Parker Hannifin has more than 40 years experience in the design and manufacturing of drives, controls, motors and mechanical products. With dedicated global product development teams, Parker draws on industry-leading technological leadership and experience from engineering teams in Europe, North America and Asia.

Local Application Expertise

Parker has local engineering resources committed to adapting and applying our current products and technologies to best fit our customers' needs.

Manufacturing to Meet Our Customers' Needs

Parker is committed to meeting the increasing service demands that our customers require to succeed in the global industrial market. Parker's manufacturing teams seek continuous improvement through the implementation of lean manufacturing methods throughout the process. We measure ourselves on meeting our customers' expectations of quality and delivery, not just our own. In order to meet these expectations, Parker operates and continues to invest in our manufacturing facilities in Europe, North America and Asia.

Electromechanical Worldwide Manufacturing Locations

Europe

Littlehampton, United Kingdom
Dijon, France

Variable Speed Drive - AC30 Series

Overview

Description

AC30 variable speed drive has been designed to provide users with exceptional levels of control, from simple open-loop pumps and fans through to closed-loop process line applications. Its flexible and highly modular construction enables a wide range of communications and I/O modules to be easily added as required.

The AC30 has been designed with simplicity in mind, but this doesn't compromise its functionality. Integrated macros for a range of applications and PLC functionality enable more capable users to create sophisticated control that would previously have required a separate PLC.

Designed for operation in environment class 3C3 and 3C4 for Hydrogen Sulphide (H₂S) as standard (tested at 25 ppm for 1200 hours), temperatures up to 50 °C with optional integrated EMC filter to C2 1st environment and DC link choke to reduce line harmonics. AC30V also complies with RoHS substance restrictions in accordance with EC Directive 2011/65/EU

Features

Flexibility

- Open-loop or optional closed-loop operation with pulse encoder feedback module
- Suitable for operation with AC induction and Permanent Magnet AC (PMAC) servo motors
- Ethernet TCP/IP as standard
- I/O expansion options
- Support for popular industrial fieldbuses
- Chassis or through-panel mount as standard

Simplicity

- Advanced control with Parker Drive Developer (PDD) software tool
- Multi-language graphical keypad
- Quick start wizards
- Terminal covers removable with drive in-situ

Reliability

- Conformally coated for harsh environment protection as standard
- Spring clamp control terminal connections
- Isolated power stack cooling with removable fan

Technical Characteristics - Overview

Designed with you in mind

Throughout every stage of the design process, our engineering teams worked to equip the AC30 with a wealth of features that benefit both OEMs and End-users alike.

Working with the three principles of Flexibility, Simplicity and Reliability, our engineers have created a product that not only delivers class-leading performance but also offers excellent usability in a host of motor control applications.

Flexibility (F)

A fully featured list of standard functionality along with the use of common control and option modules allows users to put the drive to work in many different open- or closed-loop applications without having to invest significant time and effort in re-engineering motor control systems.

Simplicity (S)

From the clear and concise backlit LCD display to the power terminal covers that can be removed with the drive in the cabinet, AC30 has been engineered to make the process of operating and maintaining the drive as easy as possible.

Reliability (R)

Although no one can guarantee problems will never happen, our engineers have taken every possible step to reduce the likelihood of them occurring, as well as including a number of features in the AC30 that will ensure any loss of productivity is minimised and production restarted as safely and as soon as possible.

Engineered cooling improves reliability

- Intelligent design minimises force ventilation requirements (R)
- Removable fan improves maintainability (R)
- Isolated power stack cooling path reduces contamination of control electronics (R)

Compact footprint, chassis or through-panel mounting

- Multi-position feet with keyhole slots for ease of mounting (F)(S)
- Reduced heat radiation allows side-by-side mounting (F)

Unobstructed access to power and dynamic brake terminals

- Terminal covers removable with drive in-situ (S)
- Dynamic brake switch fitted as standard (F)
- Easy access to DC Bus connections (S)

Suitable for harsh environments

- AC30 is conformally coated as standard and meets the requirements of environment classes 3C1, 3C2 (all defined substances) plus 3C3 and 3C4 for Hydrogen Sulphide (H₂S) (F)(R)

Suited to all environments

- Internal EMC filter options up to C2 1st environment for use in commercial buildings (F)
- CE marked to EN61800-5-1 and NRTL listed to UL508C and C22.2#14 (F)(R)
- DC link chokes above 2.2 kW reduce harmonics to below IEC/EN61000-3-12 limits (F)(R)

Expandable I/O capabilities

- A range of option modules expand AC30 to accommodate application specific I/O (F)
- High-performance, closed-loop control with pulse encoder feedback module (F)
- Spring clamp terminals reduce installation time and risk of loose connections (S)(R)

IEC 61131 PLC functionality included

- Parker Drive Developer (PDD) software lets the AC30 take greater control of its surroundings and in some cases remove the need for a PLC altogether **(F) (S)**

Ethernet connectivity and inbuilt diagnostic web pages

- Inbuilt web pages allow AC30 to be interrogated over the onboard Ethernet and Modbus TCP/IP connection **(S)**

Simplified configuration and data storage with SD cards

- SD card simplifies firmware updates and allows drive configuration and data to be stored **(S)**

Intuitive and easy to use, multi-function graphical keypad

- Remote mountable and easy to use tactile keypad makes drive setup and operation simple **(S)**

Field-fittable communications

- Seamless integration into automation systems **(F)**

Safe-Torque-Off (STO) for safety critical applications

- Protecting users and machinery against unexpected motor start-up in accordance with EN13849-1 at PLe Cat3 or SIL 3 to EN61800-5-2 **(F)(R)**

Field-fittable communications logos: EtherNet/IP, DeviceNet, CANopen, Modbus, BACnet, ControlNet, Profibus, RS-485, RS-232C.

Graphical keypad

The tactile IP55 keypad can be mounted either on the drive itself or remotely and provides access to all drive functions.

The backlit LCD display can be configured to present information in any one of a number of different languages, or even in your own custom language with your own user-defined units.

Simple setup wizard and macros

- Integrated quick start wizards means you don't have to be an expert to configure the drive within minutes
- Dedicated macros and integrated function blocks simplify the creation of specific motor control applications

Keypad Remote Mounting

The graphical keypad can be mounted remotely to the drive with the use of a connecting cable. When remote mounting, a blanking cover can be fitted to the drive in place of the keypad.

Simple and effective pump and fan control

Saving energy through speed control

Pumps and fans are widely used throughout industry. Some estimates suggest that a large proportion of these can be as much as 20 % oversized for the application they are used in. When these are operated at a constant speed, a significant amount of the power consumed by the motor is wasted, costing your company considerable amounts of money and creating additional CO₂ emissions.

Matching the speed of pumps and fans to process demands with the AC30V ensures that the motor will always operate at the optimal speed to deliver just the right amount of air or fluid. This can result in significant energy savings. A 20 % reduction in speed will actually reduce energy consumption by almost 50 % and payback can be achieved in **less than 18 months in many cases.**

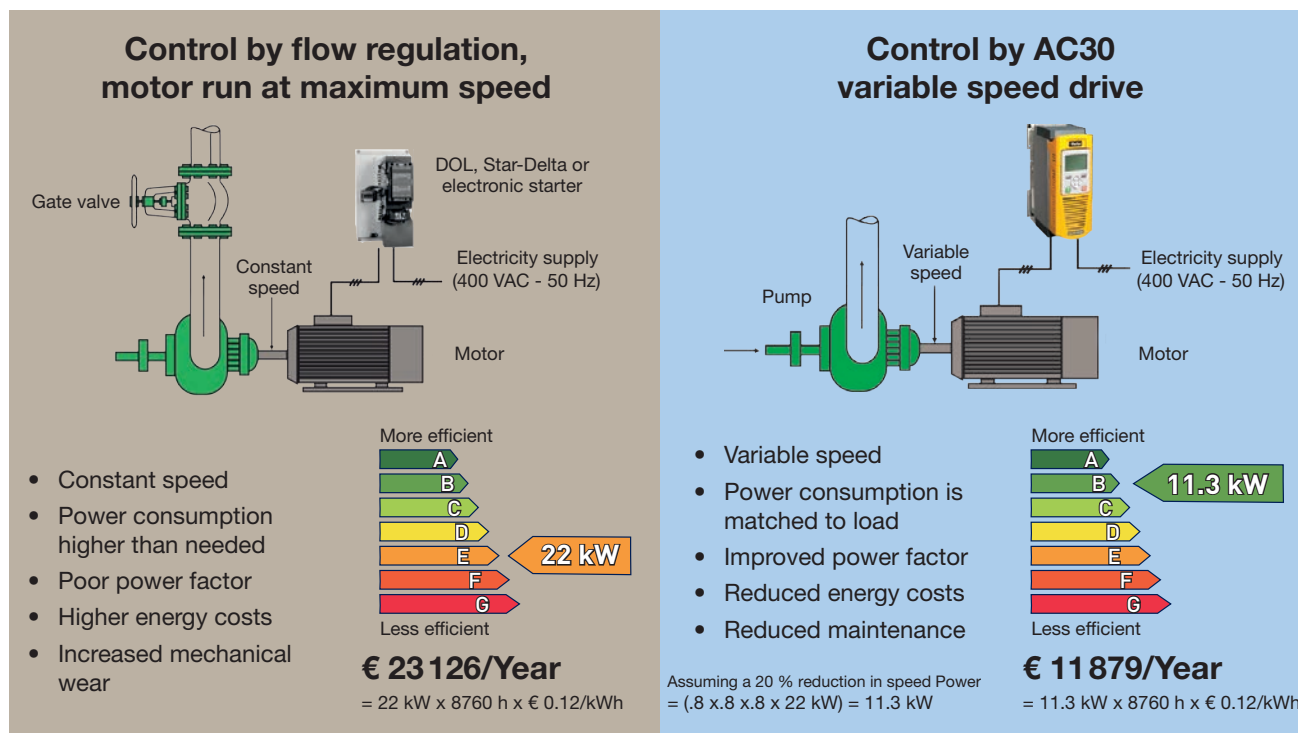

Speed control = Savings

- Up to 50 % energy savings
- Improved power factor
- Reduced maintenance
- Quieter operation
- Increased service life
- Reduced carbon footprint

Improved power factor and service life

Pumps and fans that continuously operate at maximum speed inevitably have shorter life spans and are subject to unnecessary wear and tear. Variable speed drives can help improve service life while also reducing energy consumption and improving the power factor of your installations.

In addition to the cut in energy costs, you'll also see significant savings with maintenance and repair bills and a noticeable reduction in noise pollution as well.

Total annual energy saving = € 11 247

Designed to put you in control of your energy savings

AC30 is supplied complete with a raft of features designed to simplify pump and fan control. In addition to quick setup, dedicated pump and fan macros, there are a number of other features dedicated to energy-saving pump and fan control such as:

Automatic belt breakage detection

Interactive monitoring of the running conditions of a fan allows AC30 to detect a breakage in the drive belt between the fan and motor, stop the motor and indicate an alarm condition.

Catching a spinning load - "fly-catching"

The fan control algorithms enable the AC30 to detect when a fan is free-wheeling and to regain control of it before running it at the commanded speed.

PID Control

Multiple PID control loops can be programmed to monitor process variables and adjust the speed of the motor accordingly to achieve the required variable setpoint.

Intelligent pump profiles

Our advanced intelligent pump control algorithms monitor motor loads and provides users with a number of features designed specifically for pump control applications, such as:

- Pump dry running protection
- Flow detection (low and no-flow)
- Blocked pump detection

Essential services (Fire mode)

Selected via digital input, Fire mode will cause the drive to run continuously at the maximum programmed speed ignoring all other control signals and alarm conditions.

Energy optimisation

Under constant speed conditions, the motor power waveforms from the drive are optimised to reduce motor energy consumption without compromising performance.

Skip frequencies

Up to 4 speed and frequency bands can be programmed in the AC30, to enable resonant points on the fan to be avoided, reducing vibration, wear and noise.

Timed run function

10 daily start/stop events can be programmed with different running speeds across a 7 day period. This function requires the optional Real Time Clock (RTC) module and is ideally suited to applications where regular operating patterns or periods of activity need to be accommodated, such as in a production environment.

Process Timers

Multiple hours-run timers can be programmed to generate text alerts on the drive keypad to coincide with process maintenance intervals.

Engineered for any motor

In addition to the energy-saving associated with VSD control of pumps and fans. Additional energy saving can be achieved by using permanent magnet (PMAC) servo motors. AC30 offers effective and affordable control of either AC induction motors or PMAC motors.

PMAC motors are up to 10% more efficient and 75% smaller than standard AC induction motors

Closed-loop operation

An optional pulse encoder feedback module can be added to the AC30 for applications requiring more accurate speed or torque control of AC induction motors

Application Macros

Making use of pre-defined control logic, application macros enables users to quickly configure the AC30 for control of one of a number of pre-defined functions. Information is presented to the user in a template format which can then be simply and easily populated with the specific details of the application. This removes the complexity of designing the application logic from scratch.

Basic Speed Control

Set speed and voltage or current with start / stop direction control

Automatic/Manual Control

Set to run with local speed setting or external reference

Preset Speed Control

Select up to 8 pre-programmed speeds using digital inputs

Raise / Lower

Increase or reduce speed using digital inputs

PID Control

Control the pressure, flow, temperature or any process variable

Torque Control

Control the motor torque limit using an analogue input

Fan Control

Dedicated fan control with specific fan functionality

Pump Control

Dedicated pump control with specific pump functionality

Hydraulic Pump Applications

Efficient control of hydraulic pump applications, including accumulator charging, pressure control, flow control

Applications

With 40 years experience of designing and building AC and DC drives and systems, Parker has a wealth of expertise in a host of different industries. The AC30 has been built on this experience and incorporates many flexible and innovative features, making it ideally suited for use in many industrial and commercial applications. Additional communications, expanded I/O and pulse encoder feedback option modules extend the capabilities of the AC30 still further, making it an extremely flexible and capable solution for all types of open- and closed-loop motor control requirements.

Typical applications for AC30 include...

- Industrial Pumps
- Industrial Fans
- Conveyor Control
- Air Compressors
- Machine Spindles
- Hydraulic Power Units
- Wire Drawings
- Converting Machines

Electrical Characteristics

Power Supply	400 V Nominal	
Rated Input Voltage	3 x 380...480 VAC $\pm 10\%$	
Input Frequency	45...65 Hz	
Maximum Switching Frequency	4 kHz up to maximum of 12 kHz - de-rating may apply	
Overload: Heavy Duty	150 % for 60 s - 180 % for 3 s	
Overload: Normal Duty	110 % for 60 s - 180 % of HD FLC. for 3 s	
Output Frequencies	0...590Hz	0...500 Hz at 4 kHz switching frequency* 0...1000 Hz at 8 kHz switching frequency* 0...1500 Hz at 12 kHz switching frequency*
Earth Leakage Current	>10 mA (all models)	

*Subject to export license agreement

Environmental Characteristics

Operating Temperature	0...+40 °C Normal Duty, 0...+45 °C Heavy Duty. Derate up to a maximum of +50 °C
Storage Temperature	-25...+55 °C
Shipping Temperature	-25...+70 °C
Product Enclosure Rating	IP20 - remainder of surfaces (Europe) UL (c-UL) Open Type (North America/Canada)
(Cubicle mounted)	IP20 UL (c-UL) Open Type (North America/Canada)
(Through-panel mounted)	IP20 UL (c-UL) Open Type (North America/Canada)
Altitude	1000 m ASL. Derate output by 1 % per 100 m to a maximum of 2000 m
Operating Humidity	Maximum 85 % relative humidity at 40 °C non-condensing
Atmosphere	Non-flammable, non-corrosive and dust free
Climatic Conditions	Class 3k3, as defined by EN60721-3-3
Chemically Active Substances	For the standard product, compliance with EN60271-3-3 is: <ul style="list-style-type: none"> Both classes 3C3 and 3C4 for Hydrogen Sulphide gas (H₂S) at a concentration of 25 ppm for 1200 hours Both classes 3C1 (rural) and 3C2 (urban) for all 9 defined substances as defined in table 4
Operating Vibration	Test Fc of EN60068-2-6 10 Hz<=f<=57 Hz sinusoidal 0.075 mm amplitude 57 Hz<=f<=150 Hz sinusoidal 1 g 10 sweep cycles per axis on each of three mutually perpendicular axis
Overvoltage Category	Overvoltage category III (numeral defining an impulse withstand level)
Pollution Degree	Pollution degree II (non-conductive pollution, except for temporary condensation) for control electronics Pollution Degree III (dirty air rating) for through-panel mounted parts

Standards and Conformance

North America/Canada	Complies with the requirements of UL508C and CSA22.2 #14 as an open-type drive
European LV Directive	This product conforms with the Low Voltage Directive 2006/95/EC
European EMC Directive	CE Marked in accordance with 2004/108/EC
RoHS Compliance	This product complies with RoHS substance restrictions in accordance with EC Directive 2011/65/EU
Reach	This product complies with the REACH regulations EC1907/2006
European Machinery Directive	Safe-Torque-Off (STO) complies with the requirements of ISO13849-1 (Safety-related parts of control systems) at PLe Cat3 or SIL 3 to EN61800-5-2

Safe Torque Off (STO)

The AC30 series features Safe Torque Off functionality as standard, offering users protection against unexpected motor start-up in accordance with EN13849-1 at PLe Cat 3 or SIL 3 to EN61800-5-2.

The STO functionality helps protect personnel and machinery by preventing the drive from restarting automatically. It disables the drive pulses and inhibits the power supply to the motor, so that the drive cannot generate any potentially hazardous movement. The state is monitored internally within the drive.

Term.	Label	Description
X10/01	STO A Input	STO Channel A input signal
X10/02	STO Common	Return signals for STO A and STO B
X10/03	STO B Input	STO Channel B input signal
X10/04	STO Common	Return signals for STO A and STO B
X10/05	STATUS A	STO Status Indication
X10/06	STATUS B	STO Status Indication

The example wiring diagram shows the minimum connections required to implement STO with the AC30 series AC drives.

Users must conduct a risk assessment to identify the appropriate STO wiring scheme and ensure that all safety requirements are met.

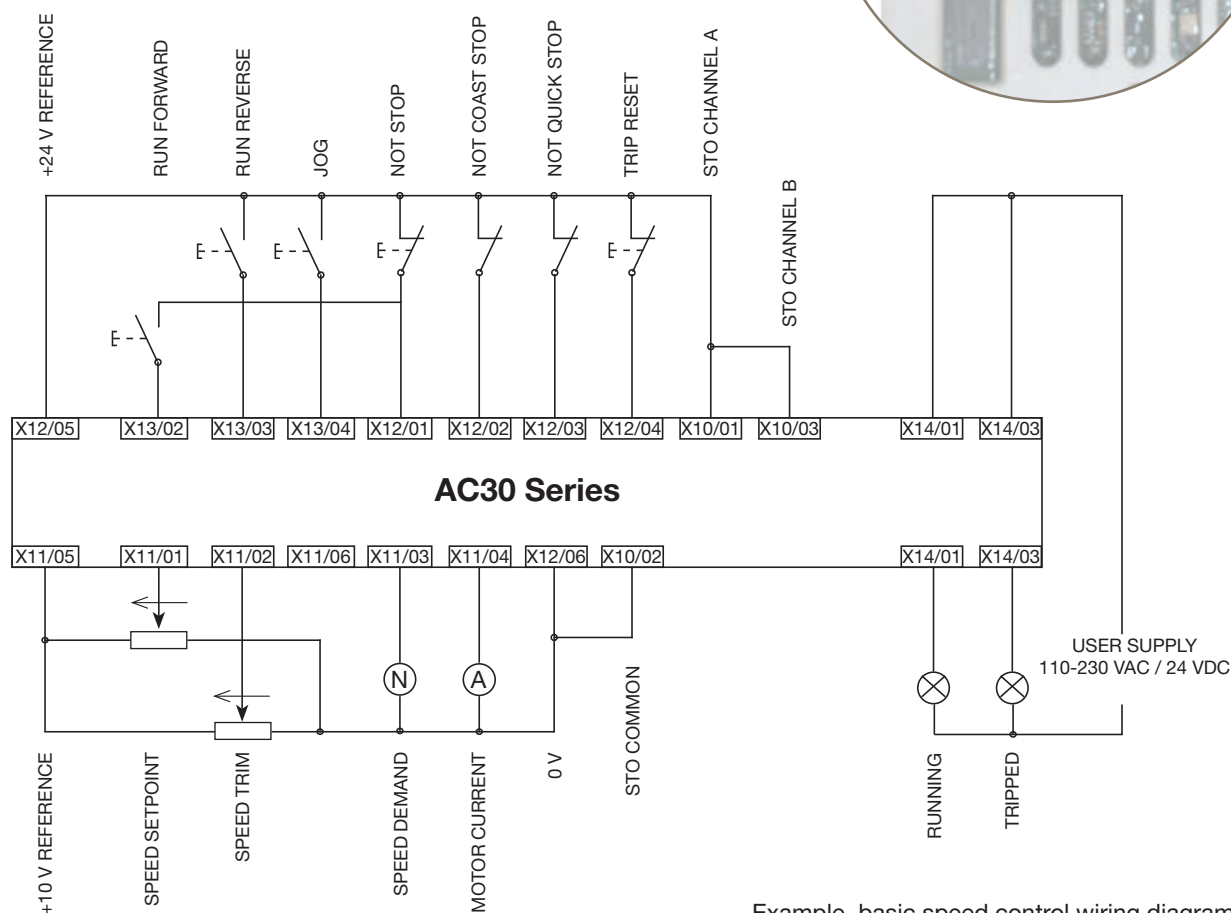

It is the user's responsibility to ensure the safe and correct use of the STO function of the AC30 Series. User's should read and fully understand chapter 6 (Safe Torque Off) of the product user manual. Manual No. HA501718U001

Accessories and Options

Operator Keypad

Order Code	Description
7001-00-00	IP54 Graphical keypad
7001-01-00	Keypad blanking cover
LA501991U300	Keypad remote mounting kit (3 m cable and screws)

Description:

The backlit LCD graphical keypad can be either mounted locally on the drive or remotely with the use of a remote mounting kit. The keypad has 3 pass code protected user access levels which allows operators, technicians, or engineers to gain access to the relevant level of drive information.

The keypad makes use of a softkey menu system and can be used to set-up and commission the drive, change parameter settings, monitor running status or diagnose warning or alarm conditions.

The keypad can display information in one of the following languages. The display is also capable of displaying a user defined language set as well as a customised set of units.

- English
- German
- Spanish
- French
- Italian
- Customised

Mounting and Filter Kits

Order Code	Description
LA502668	Frame D through panel mounting gasket kit
LA502669	Frame E through panel mounting gasket kit
LA502670	Frame F through panel mounting gasket kit
LA502471	Frame G through panel mounting gasket kit
LA502472	Frame H through panel mounting gasket kit
LA502793	Frame J through panel mounting gasket kit
LA501935U001	Frame D C2 environment filter kit
LA501935U002	Frame E C2 environment filter kit
LA501935U003	Frame F C2 environment filter kit
LA501935U004	Frame G cable screening kit
LA501935U005	Frame H cable screening kit
LA501935U006	Frame J cable screening kit

LA501935U001

The environment filter kit consists of a motor cable ferrite core and screening brackets and is required to comply with the requirements of the EMC directive for a C2 environment with frames D, E and F. For frame G the drive has a different EMC internal filter which is required in addition to the screen kit. For frame H, J and K an external EMC filter is required.

Communication Interfaces

7003-PB-00	PROFIBUS DP-V1 communication interface
Supported Protocols	PROFIBUS-DP; Demand data and Data exchange
Communication Speed	Up to 12 Mbits/s; automatically detected
Max. number of devices	32 per segment, 126 total
Supported Messages	Up to 152 bytes cyclic I/O, 68 bytes class 1 and 2 acyclic data, 152 bytes configuration data. GSD file provided

7003-DN-00	DeviceNet communication interface
Supported Protocols	DeviceNet protocol (slave)
Communication Speed	125, 250, 500 kbits/s or automatically detected
Max. number of devices	64
Supported Messages	Bit strobed I/O, Polled I/O, Cyclic I/O, Change of state, Explicit messaging

7003-CB-00	CANopen communication interface
Profile	DS301 V4.02
Communication Speed	10 k, 20 k, 50 k, 125 k, 250 k, 500 k, 1 Mbits/s or automatically detected
Max. number of devices	127
Supported Messages	SDO, PDO, NMT, SYNC

7003-PN-00	PROFINET I/O communication interface
Supported Protocols	PROFINET I/O Real-Time (RT) Protocol
Communication Speed	100 Mbits/s full duplex
Max. number of devices	Virtually unlimited
Supported Messages	Up to 256 bytes of cyclic I/O in data in each direction

7003-IP-00	Ethernet IP communication interface
Supported Protocols	Ethernet IP
Communication Speed	10/100 Mbits/s full/half duplex
Max. number of devices	Virtually unlimited
Supported Messages	Up to 256 bytes of consumed data and 256 bytes of produced data, CIP parameter object support, Explicit messaging

7003-RS-00	RS485 / Modbus RTU communication interface
Supported Protocols	Modbus RTU
Communication Speed	1200 to 115 200 bits/s
Max. number of devices	247
Supported Messages	Up to 256 bytes of cyclic I/O data in each direction

Communication Interfaces

7003-BN-00	BACnet MSTP communication interface
Supported Protocols	BACnet/MSTP
Communication Speed	up to 76.8 kbits/s
Max. number of devices	255
Supported Messages	Real time synchronisation according to DM-T S-B, COV notifications and Alarm/Event functionality

7003-BI-00	BACnet/IP communication interface
Supported Protocols	BACnet/IP
Communication Speed	100 Mbits/s
Max. number of devices	255
Supported Messages	Real time synchronisation according to DM-T S-B, COV notifications and Alarm/Event functionality

7003-CN-00	ControlNet communication interface
Supported Protocols	ControlNet
Communication Speed	5 Mbits/s
Max. number of devices	99
Supported Messages	Polled I/O

7003-EC-00	EtherCAT communication interface
Supported Protocols	CANopen over EtherCAT (CoE) DS301 compliant
Communication Speed	100 Mbits/s
Max. number of devices	65534
Supported Messages	SDO, PDO, NMT, SYNC

7003-IM-00	Ethernet TCP communication interface
Supported Protocols	Modbus/TCP
Communication Speed	10/100 Mbits/s
Max. number of devices	Virtually unlimited
Supported Messages	CIP parameter object support, Explicit messaging

Input and Output Cards

7004-01-00 - General Purpose I/O Module

Digital Inputs & Outputs	4x Digital inputs or outputs
Analogue Inputs/Outputs	3x Analogue inputs (± 10 V)
Relay Outputs	2x Volt-free relay outputs (230 VAC)
Motor Thermistor Inputs	1x Motor thermistor input
Real time Clock	Included

Description:

The general purpose I/O (GPIO) option module can be fitted to all AC30V series drives in the upper I/O option module slot. The modules are field-fittable and offer users the opportunity to expand the drives standard I/O capability, allowing more complex motor control solutions to be implemented.

Connection Details:

Example connection details for 7004-01-00 GPIO module

Terminal	Label
X20/01	DIN11/DOUT11
X20/02	DIN12/DOUT12
X20/03	DIN13/DOUT13
X20/04	DIN14/DOUT14
X20/05	+24 VDC
X20/06	0 VDC COMMON
X21/01	REFERENCE
X21/02	ANIN11
X21/03	REFERENCE
X21/04	ANIN12
X22/01	MOTOR THERMISTOR
X22/02	MOTOR THERMISTOR
X23/01	RLY11

X23/04	RLY12
X23/04	RLY12

7004-02-00 - Motor Thermistor Input Module

Motor Thermistor Inputs	1x Motor thermistor input
Thermistor Compatibility	PTC, NTC, KTY
Thermistor Resistance Range	0...4.5 k Ω

Description:

The isolated motor thermistor input module provides a means of monitoring motor temperature in order to protect the motor from a potentially damaging high temperature.

By default the drive will trip if the motor exceeds a user-defined temperature threshold thereby preventing motor temperature from rising further.

7004-03-00 - Real Time Clock and Motor Thermistor Input Module

Motor Thermistor Inputs	1x Motor thermistor input
Thermistor Compatibility	PTC, NTC, KTY
Thermistor Resistance Range	0...4.5 kΩ
Time Format	Seconds
Accuracy (drive powered)	±1 minute / month (RTC trim=0)
Accuracy (drive unpowered)	±5 minutes / month (RTC trim=0)
Battery Backup Duration	6 Months

Description:

A real-time clock (RTC) is provided for the user to program the drive to perform functions at specified times. The RTC is battery-backed, so continues to run when the drive is unpowered. The battery recharges when the drive is powered.

An isolated motor thermistor input is also included in the 7004-03-00 module.

7004-04-00 - Pulse Encoder Feedback Module

Maximum Input Frequency	250 Hz per channel
Supply Voltage Output	5 V, 12 V, 15 V, 24 V
Input Format	Quadrature, or Clock (inputs A & /A) and Direction (input B & /B)
Motor Thermistor Details	As 7004-02-00

Description:

The pulse encoder feedback module allows an incremental encoder to be connected to the AC30 allowing users to take full advantage of the enhanced torque control and speed regulation functionality of the drive. In addition, the 7004-04-00 is also equipped with a single motor thermistor input.

Terminal	Description
X24/01	Channel A
X24/02	Channel /A

X24/08	Cable screen
X22/01	Motor thermistor
X22/02	Motor thermistor

Ancillary Parts

Output Chokes

To reduce capacitive currents and prevent nuisance tripping in installations with longer cable runs, a choke may be fitted to the drives output in series with the motor.

Order Code	Motor Power Normal Duty [kW]	Choke Inductance [mH]	Current [A _{rms}]

Note 1: For output chokes over 75 kW please contact ssdedcs@parker.com

EMC Filters

A range of custom designed optional EMC (Electromagnetic Compatibility) filters are available for use with Parker's range of drive products. They are used to help achieve conformance with the EMC directive BS EN 61800-3:2004- "Adjustable speed electrical power drive systems Part 3". These external filters offer C2 compliance to 25m and C1 compliance to 10m.

Braking Resistors

These resistor sets are designed for stopping the system at rated power. Rated for 10 seconds in a 100 seconds duty cycle. They are metal-clad resistors and should be mounted on a heatsink (back panel) and covered to prevent injury from burning.

Brake resistor selection

Brake resistor assemblies must be rated to absorb both peak braking power during deceleration and the average power over the complete cycle.

Peak braking power	=	$\frac{0.0055J \times (n_1^2 - n_2^2) (W)}{t_b}$
Average braking power P_{av}	=	$\frac{P_{pk} \times t_b}{t_c}$
J: total inertia [kgm ²] n ₁ : initial speed [min ⁻¹] n ₂ : final speed [min ⁻¹]		t _b : braking time [s] t _c : cycle time [s]

Resistors above 500 W

Resistors above 500 W are available upon request :

- IP20 protection up to 3 kW
- IP13 protection between 4.2 and 9.8 kW

Model	Impedance [Ω]	Nom. Power [W]	Dimensions [mm]

Parker Drive Quicktool (PDQ) Software

Description

PDQ is a simple software tool for installing, programming and monitoring applications on the AC30 series variable speed drive.

Communication between the drive and PC is via the in-built Ethernet port at the top of the drive and the software automatically detects all AC30s connected to the Ethernet network.

Once the drive is selected, a simple wizard guides the user through the installation process. Starting with the required application the user is asked to choose their motor data from a motor database or enter their own specific data, to configure the I/O and communications and finally commission the drive. The drive parameters can then be monitored, charted and adjusted.

The drive also supports its own webserver providing access to all drive parameters for quick and easy changes.

Parker Drive Quicktool is shipped with every drive and can also be downloaded for free from the Parker website. www.parker.com/ssd/pdq

Parker Drive Developer (PDD) Software

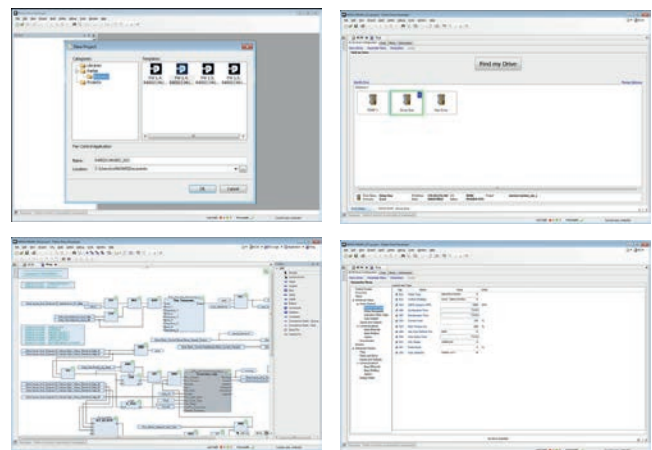

Description

PDD is a fully featured PLC programming tool for the AC30 series variable speed drive, supporting all IEC-61131 languages including ladder logic, structured text and function block diagrams.

It provides access to all drive parameters and enables the user to create powerful AC30 drive solutions. It's also possible to create custom parameters and menus so the user can describe the setup and status of the drive in the context of their own application.

To help start the development process Parker provides pre-installed libraries with the following functionality:

- Basic Speed Control
- Fan and Pump Control
- Winder Blocks
- Hydraulic Control
- Cascaded Pump Control

4	Brake Switch
B	Brake switch fitted (standard)
N	No brake switch option ⁽¹⁾
5	EMC Filter ⁽²⁾
N	No filter fitted
E	Category C3 filter fitted (standard)
F	Category C2 filter fitted
6	Graphical Keypad
0	No keypad fitted
1	Blanking cover fitted
2	Graphical keypad fitted
7	Environmental Coating ⁽³⁾
S	Standard 3C3 coating
E	Enhanced coating
8	Special Options
0000	No special options

⁽¹⁾ Available for frames H & J only

⁽²⁾ The choice of filter should be determined by the environment in which the drive will be installed as defined in IEC/EN61800-3
C2 = domestic & commercial, C3 = industrial

⁽³⁾ AC30 is conformally coated as standard for use in environments class 3C3 and 3C4 for Hydrogen Sulphide gas. It is also compliant to both classes 3C1 (rural) and 3C2 (urban) for all nine substances defined in table 4 in EN60271-3-3
C2 filter only offered on frames D-G. For other frames use external EMC filter

*Available summer 2015.

Versatile Control Module

It is possible to order the AC30 Series as a separate power stack and versatile control module. This is useful for distributor or MRO spare part stocking.

Parker's Motion & Control Technologies

At Parker, we're guided by a relentless drive to help our customers become more productive and achieve higher levels of profitability by engineering the best systems for their requirements. It means looking at customer applications from many angles to find new ways to create value. Whatever the motion and control technology need, Parker has the experience, breadth of product and global reach to consistently deliver. No company knows more about motion and control technology than Parker. For further info call 00800 27 27 5374
